

To Whom It May Concern,

I am delighted to recommend Léo Sevin, who has been a wonderful Physical Education teacher at Saigon Star International School from 2023-2025.

During his time with us, Léo made significant contributions to our school community, including:

Serving as PE Coordinator, where he developed new assessments and sports programming aligned with the UK and IPC curricula. These assessments evaluated motor skills and responsibilities in social roles such as referee, coach, and self-led warm-ups. Each skill was assessed on a Level 1 to Level 4 scale, enabling learners to understand their current progress and how far they were from achieving the learning goal, which was set at Level 3.

Creating and sharing assessment folders to support the school's IPC accreditation process.

Organising sports events, such as Sports Days and Inter-school competitions, fostering school spirit and engagement.

Establishing a House Team system with four teams, involving learners from all primary and middle school classes. This initiative boosted learner motivation and strengthened connections across the school.

Léo is deeply committed to fostering personal growth and teamwork in his students, emphasising respect, resilience, and collaboration alongside skill development. His structured assessment system empowered students to take ownership of their learning journey, providing clear feedback and actionable steps for improvement.

In addition to his work in PE, Léo consistently demonstrated adaptability and creativity, making the most of diverse sports infrastructures and introducing innovative ideas to engage learners. His efforts received praise from both the school and the community, leaving a lasting impact on our physical education program.

Léo's dedication and innovative approach make him a valuable asset to any institution. I am confident he will continue to inspire and make a difference wherever he goes.

Please feel free to contact me for further information.

Noel Collins
